**3. APPLICABLE TO HISTORY, ECONOMICS, POLITICAL SCIENCE,
LINGUISTICS, AND ANY OTHER HUMANITIES**

SEMESTER-II

COURSE 1: APPLICATIONS OF ARTIFICIAL INTELLIGENCE

Theory

Credits: 3

3 hrs/week

Course Objectives

1. Provide a foundation in the AI ecosystem, including hardware, cloud, and edge platforms, in a non-technical way for Arts and Social Sciences students.
2. Familiarize students with data types, sources, and public repositories that fuel AI applications in society and humanities.
3. Explain the process of preparing and managing AI data pipelines through collection, annotation, and cleaning.
4. Explore real-world applications of AI in arts, culture, literature, linguistics, and languages.
5. Introduce applications of AI in social sciences such as economics, political science, psychology, history, and sociology, with an emphasis on ethics and responsible adoption.

Course Outcomes

On successful completion of this course, students will be able to:

1. Explain the AI ecosystem (hardware, cloud, edge devices) and its societal relevance.
2. Differentiate data types and identify public datasets relevant to social sciences, arts, and humanities.
3. Describe the steps of an AI data pipeline (collection, annotation, cleaning, preparation) in simple terms.
4. Illustrate the role of AI in arts, languages, and cultural heritage with practical, real-world examples.
5. Analyze applications of AI in social sciences (economics, politics, psychology, history, and society) and evaluate ethical concerns.

Unit 1. Infrastructure and Platforms for Building Applications using AI

Hardware used in building AI applications: Processors - CPU, GPU, TPU, NPU, Memory - RAM, VRAM, Storage - HDD, SSD

Platforms for building applications using AI: Online platforms (Example - Google AutoML, H2O.ai, Teachable Machine or similar platforms - for practice only); Desktop (No-code/Low-code) platforms (Orange Data Mining, KNIME, Weka, RapidMiner or similar tools - for practice only).

Edge AI: Concept; Applications in daily life in devices like Refrigerators, Led Bulbs, Surveillance Cameras, Micro Ovens, Smart Cars/Scooters; Edge AI in smart Appliances

Unit 2: Foundations of Data - Types, Ethics and Utility in Building Applications using AI

Importance of data in building AI applications: Data as the fuel for AI, Role of big data in training AI models.

Conceptual Foundations of Data: Data vs. Information vs. Knowledge.

Structure of Data: Structured, Semi-Structured, and Unstructured Data.

Modalities of Data: Text, Image, Audio, Video, Tabular, Time-Series, and Spatial Data.

Formats of Data: Text Formats (CSV, JSON, XML), Image Formats (JPEG, GIF, PNG), Audio/Video (MP3, WAV, MP4, AVI).

Data Repositories: Definition of public Datasets; Definition of private Datasets; Importance of Public Datasets, Popular Public Dataset Repositories (Example - Kaggle, Hugging Face Datasets, UCI Machine Learning Repository, Google Dataset Search or similar ones - for demonstration only), Dataset licensing and usage rights.

Ethics, Privacy in Data Usage: Privacy concerns related to data usage; Regulations governing data usage - GDPR, HIPAA (Overview), Ethical use of data, Responsible AI data practices.

Unit 3. The AI Data Pipeline: From Collection to Model Readiness

The AI Data Pipeline: Stages and Components: Key Stages (Data Collection, Annotation, Preprocessing, Splitting, Feeding into AI Models)

Core Components: Ingestion, Storage, Processing, Validation, Delivery

Data Collection Methods for AI: Manual Input (Surveys, forms, human-curated entries), Sensors & IoT Devices (Real-time data from physical environments), System Logs & Transactions, Web Scraping (Automated extraction from websites), APIs (Structured data access from external platforms)

Data Annotation and Labelling: Definition & Importance; Annotation Methods: Manual Annotation, Automated Annotation; Types of Annotation: Classification, Bounding Boxes, Segmentation, Transcription, Named Entity Recognition (NER)

Data Cleaning and Preprocessing: Importance of data cleaning; Understanding “Dirty” Data: Missing Values, Duplicates, Incorrect Formats, Outliers, Noise; Steps in Data Cleaning: Identify Issues, Handle Errors (Imputation, Removal), Validate Cleaned Data

Data Splitting: Splitting data into training set and test set.

Data Transformation Techniques: Normalization, Transformation, Feature Engineering (Conceptual)

Unit 4: AI in Social Sciences and Society:

AI in Economics: Predicting market trends, consumer behavior, and economic forecasting.

AI in Political Science & Public Policy: Social media analysis for political campaigns, Opinion mining & election trend prediction.

AI in Psychology & Sociology: Emotion recognition from facial expressions and text, AI chatbots in mental health counseling (conceptual).

AI in History & Society: Digital archives and historical document analysis, AI for preserving ancient languages and scripts, Social impact of AI on jobs, privacy, and democracy.

Unit 5: AI in Arts, Languages, and Cultural Studies

AI in Literature & Languages: Machine translation (Google Translate, DeepL), Sentiment analysis in literature and media reviews, AI-assisted creative writing (chatbots, story generators, poetry)

AI in Arts & Culture: AI in music composition & art generation (painting, film scripts), Digitization and preservation of cultural heritage using AI, Identifying fake art and forgeries

Lab Experiments:

Lab 1: Explore Open Data (Economics / Sociology)

- **Tool:** Our World in Data or World Bank Data Explorer (<https://data360.worldbank.org/en/search>)
- **Task:** Choose indicators (e.g., Literacy, GDP per capita, Poverty, Unemployment).
- **Procedure:**
 1. Open World Bank / Our World in Data.
 2. Select one country or compare multiple countries.
 3. Use the interactive charts to see historical trends.
- **Observation:** How does education level impact income or health?
- **Outcome:** Understand correlations between **socio-economic indicators**.

Lab 2: Data Annotation (NER & Classification)

- **Tool:** Prodigy Demo (<https://demo.prodi.gy/>) -free online demo, no install
- **Activity:**
 1. Try Named Entity Recognition (NER) demo.
 2. Highlight organizations, people, and places in sample text.
 3. Compare manual vs. automated annotation.
- **Outcome:** Students understand **manual vs. automated annotation** and why labeling is crucial.

Lab 3: Automatic Text Classification for Sociology

- **Tool:** Text2Data Sentiment Analysis Demo (<https://text2data.com/Demo>) -free online demo
- **Task:** Copy-paste 5 messages related to climate change, caste or gender.

- **Observation:** Tool classifies them as Positive, Neutral, or Negative.
- **Outcome:** Understand “annotation” and “classification labels.”

Lab 4: Word Clouds for Political Speeches (Languages / Political Science)

- **Tool:** WordArt Cloud Generator (<https://wordart.com/create>) - Free Online
- **Procedure:**
 1. Copy a Prime Minister’s speech or Economic Budget highlights.
 2. Paste into WordArt.
 3. Generate a word cloud → biggest words = most repeated.
- **Observation:** Main themes in political communication.
- **Outcome:** Learn how text visualization shows political/economic priorities.

Lab 5: Bias in Job Advertisements (Sociology / Gender Studies)

- **Tool:** Gender Decoder for Job Ads (<https://gender-decoder.katmatfield.com/>) -Free Online or Any other related tool
- **Procedure:**
 1. Copy text from 5 job advertisements.
 2. Paste into the gender bias detector.
 3. Note masculine vs feminine coded words.
- **Observation:** How language influences gendered hiring.
- **Outcome:** Awareness of AI in analyzing workplace bias.

Lab 6: Language Detection & Translation (Languages / Linguistics)

- **Tool:** Google Translate (<https://translate.google.co.in/>)
- **Task:** Enter text in regional/foreign languages.
- **Procedure:**
 1. Paste short paragraph in Telugu, Hindi, French, etc.
 2. Translate into English.
 3. Reverse-translate to see changes.
- **Observation:** Which meanings are lost in translation?
- **Outcome:** Students understand AI’s strengths/limits in translation.

Lab 7: Text Summarization of Articles (Languages / Literature)

- **Tool:** SMMRY (<https://smmry.com/>) or Scholarcy Free Summarizer (<https://www.scholarcy.com/article-summarizer>)
- **Task:** Take a long article or essay.
- **Procedure:**
 1. Paste article into tool.
 2. Generate summary.
 3. Compare AI summary vs. student's manual summary.
- **Observation:** AI captures main ideas but may miss nuances.
- **Outcome:** Learn how **AI helps in academic reading & summarization.**

Lab 8: Talk to a Free Chatbot

- **Tool:** [ChatGPT Free](#) or Poe or any other related tool
- **Activity:** Students ask questions like:
 - “Tell me a Telugu proverb and its meaning.”
 - “Explain World War II in 5 simple lines.”
- **Outcome:** **Data delivery/output** stage - AI as a dialogue system.

Lab 9: Story Generator (Creative Writing / Literature)

- **Tool:** AI Dungeon (<https://play.aidungeon.com/>) -free play or DeepAI Text Generator (<https://deepai.org/chat/text-generator>)
- **Activity:** Give a starting line (e.g., “Once upon a time in Amaravati...”) → AI continues story
- **Outcome:** How **training data influences creativity** in AI.

Lab 10: AI Art Generator (Culture & Arts)

- **Tool:** DeepAI Text-to-Image (*free*) (<https://deepai.org/machine-learning-model/text2img>) or any other related tool
- **Activity:** Ask students to generate:
 - “A painting of Bharat Mata in Picasso style.”
 - “Hyderabad Charminar in futuristic design.”
- **Outcome:** Data pipeline applied to **images.**

VALUE ADDED COURSE

Vocab Vault for Competitive Exams
Syllabus

Duration: 30 hours

Marks: 50

Credits: 2

Unit I: Synonyms

Unit II: Antonyms

Unit III: One Word Substitutes

Unit IV: Idioms and Phrases

Introduction to the Course:

English is important for most of the competitive exams in India. Not just TOEFL or GRE but most of the competitive exams like UPSC, SSC CGL, Bank selection exams, APPSC examinations and many others test the English comprehension skills of students. All these exams have mandatory section where the grammar, vocabulary and comprehension skills of students are tested. Hence, this Value-Added course named *Vocab Vault for Competitive Success* is designed to improve the vocabulary of the students with special focus on vocabulary knowledge required for competitive exams. This course would be offered to the interested students of all streams. Through this course simple techniques to learn and remember new vocabulary will be taught to the students which will not only help to improve students' vocabulary but also help them to succeed in competitive exam.

Course Outcomes:

The following outcomes are expected to be achieved by the students by the end of this course:

- Learn the listed synonyms and antonyms.
- Learn the listed one-word substitutes.
- Learn the meanings of idioms and phrases listed.
- Develop interest and techniques to learn and understand the meanings of new vocabulary.
- Succeed in competitive exams' English comprehension sessions in future.

Assessment Pattern

A test consisting of Multiple-Choice Questions for 50 marks conducted through online or offline mode.
